

ARGENTINA, ESTAMOS AQUI

Time Medical is excited to announce yet another PICA Open Whole Body MRI installation – this time by GEMED in Argentina at Sanatorio San Martín!

According to International Trade Administration:

Argentina had a population of 47.3 (2022), ranks third in South America in total population and 33rd globally. Around 35% of the population relies on public hospitals. The rest have some form of healthcare coverage, either from social security/union-run (60% of the population) or the private healthcare system (13%). Almost 10% of the population have more than one coverage system. Around 3.5 million elderly people and individuals with disabilities are covered by PAMI (similar to Medicare in the United States).

Time Medical is pleased to have GEMED as customer, an Argentine company dedicated to the import, distribution, representation, installation, training and maintenance of medical diagnostic imaging equipment, in the areas of medical, dental, veterinary and research imaging preclinical, which operates in both the private and public sector.
